WHOLESALE PRICE LIST for 1941-1942

TERMS OF SALE

(Please read carefully when ordering)

PRICES—5 and 50 of the same variety and size at 10 and 100 rates respectively. For larger quantity than listed inquire. When the price of a single plant is not listed under "Each" add 25% to the 10 rate. All quotations are for immediate acceptance subject to prior sale.

DISCOUNT of 3% offered for orders with cash. Attractive discounts for B&B stock in truck or carload lots.

ADDITIONAL CHARGES to the listed prices will be made when the customer marks or selects plants in the nursery.

TERMS OF PAYMENT. Cash with order for immediate shipment. Booking orders will be accepted when accompanied by remittance covering 25% of the purchase amounts. C. O. D. orders accepted with a deposit of 25%.

SUBSTITUTIONS. In case you do not desire substitution with the nearest sort, color or size please state clearly on your order "No Substitution."

PACKING CHARGES. Free packing for cash orders. At cost in other cases.

TRANSPORTATION. Please state whether order is to be shipped by parcel post, express, rail or motor

freight. When no instructions are given we will use our judgment.

For parcel post shipments be sure to remit amount sufficient to cover postage; otherwise instructions are void.

Our responsibility ceases upon delivery to forwarding companies; claims for damages in transit should be made upon the latter.

LIABILITY. We are not liable for injury to stock from any cause beyond our control. Unless we make the plantings and are remunerated for it we give no guarantee that the stock will live and grow.

CLAIMS. If, by any possibility, an error has been made please notify us immediately. We will be pleased to promptly rectify the mistake.

REMARKS. Lining out stock is listed here in light face type.

(C) indicates "from cutting," (S) seedling, (G) grafting. (T) indicates once transplanted, (TT) twice transplanted, etc. All lining out stock is in bare roots unless otherwise indicated.

Specimen stock is listed in bold face type; B&B means balled and burlapped.

NOTICE. This price list cancels all previous quotations and are subject to change without notice.

CONIFERS

CEDRUS DEODARA

We have only a very limited supply.

	Each	10	100
18-24 inch, field grown, B&B	.90		
2-3 feet, field grown, B&B....	1.25		
4-5 feet, field grown, B&B....	2.00		
5-6 feet, field grown, B&B....	3.00		

CRYPTOMERIA JAPONICA VAR YOSHINO

We are the only nursery offering this valuable variety. It grows into a very symmetrical pyramidal shape and it is very compact with fine foliage. This variety is much superior to the ordinary Crypto-

meria. Although it prefers a heavy moist soil, it will do well in any type of soil.

6-8 inch, C. T.	1.25	10.00
8-12 inch, C. TT.	1.50	12.00
3-4 feet, field grown, B&B....	2.50	
4-5 feet, field grown, B&B....	4.00	

CUNNINGHAMIA LANCEOLATA

(Chinese Fir)

12-18 inch, C. TT.	1.50	12.00
3-4 feet, field grown, B&B....	1.50	
4-5 feet, field grown, B&B....	2.50	
5-6 feet, field grown, B&B....	4.00	

CUNNINGHAMIA LANCEOLATA GLAUCA

(Blue Chinese Fir)

The character and general appearance of this variety is much the same as the above variety, but the Lanceolata Glauca has a more dense and glaucous foliage. This plant will soon take its deserved place in the Southern landscape. We have only a limited supply.

8-12 inch, C. T.	1.50	12.00
3-4 feet, field grown, B&B....	2.50	
4-5 feet, field grown, B&B....	3.50	
5-6 feet, field grown, B&B....	4.50	

CUPRESSUS TORULOSA MAJESTICA

(Bhutan Cypress)

This is a fast growing conifer with a dense and broad pyramidal shape and it bears light green, thread-like foliage. The advantage of this shrub is that it will not burn as some conifers do in this climate.

3-4 feet, field grown, B&B	2.50
4-5 feet, field grown, B&B	3.50

HOWARD'S ARBORVITAE

The following arborvitae were originated by Howard's Montopolis Nursery:

BLUE CONE ARBORVITAE

Symmetrical and pyramidal shape with dense foliage of bluish tone. A very compact grower.

BLUESPIRE ARBORVITAE

Columnal shape with pleasant bluish foliage. This somewhat resembles Texarkana Glauca Arborvitae, but is much more compact.

GREEN GLOBE ARBORVITAE

Resembles Bonita Arborvitae with very compact growth; globe shaped with rich green foliage.

ABELIA EDWARD GOUCHER

This is a new introduction of the U. S. Department of Agriculture. It bears bright lavender-pink flowers. We have tried this variety in our nursery, and have found it thrives very satisfactory down South as well as in the North. We believe this is one of the best novelties on account of its beautiful habit of growth and profusion of bloom.

We can supply only small lining out size.

3 inch pot	1.50	12.00

ARDISIA JAPONICA

This is one of the best evergreen ground-cover plants. Its thick leathery foliage and many running branches closely resembles the Trailing Arbutus (*Epigaea repens*). It bears very attractive red berries in the winter. This plant thrives very well in the South and is well adapted to shade and light, well-drained soil.

Partial View of Azalea Lath House

AZALEAS

A few cultural suggestions:

1. Azaleas thrive in acid soil. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.

2. Lime or alkaline soil is poisonous. In case the Azaleas are to be planted in such a soil, remove original soil and use plenty of leaf mold or peat moss mixed with the other soil which should contain no alkali; or if alkaline apply Aluminum Sulphate at the rate of one 4 inch pot full to a wheelbarrow of soil.

3. As the azalea root system is very shallow, it dries fast. Apply sufficient water to keep roots moist always.

4. Azaleas delight in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be made where all surplus water will run off quickly.

5. Azaleas thrive best in partial shade (when the bush grows larger it will stand the full sunlight) but many good blossoms cannot be expected if the bushes are planted under complete shade.

6. The Azalea is not a gross feeder. If plenty of leaf mold or like organic matter is applied, it does not require any commercial fertilizer. On the contrary, very often a heavy application of fertilizer injures the root system. However, if necessary a light application of well rotted cow manure, sheep manure or commercial fertilizers such as Vigoro is beneficial.

7. Red Spider and Thrips sometimes trouble the plants. Frequent spraying of the plants with plain water will usually keep this trouble away. If this does not work, spray or dust the plant with a sulphur mixture.

New Azaleas

Several years ago, with special permission of the U. S. government, we imported from Japan many rare varieties of Azaleas. Ever since, we have continued our tireless efforts to develop these varieties. Our devotion of time and utmost care has rewarded us with the pleasure we now have in introducing some of these rare plants to our customers. The supply is very limited. Book your order early.

MURASAKI-BOTAN (Purple Peony)

Belong to the *Ledifolia* family. Flowers are made up of 15 to 20 long but narrow petals of light purple color, 2 to 3 inches in diameter. In appearance they very much resemble asters, despite the fact that they are Azalea blossoms. It blooms in March. Leaves are narrow and yellowish dull green with hairy segments. Fast grower and very hardy.

SAKURAGATA

One of *Macrantha* hybrid (Satsuki). Flower is single, 2 to 2½ inches in diameter. Dark crimson with large patch of white in the throat, very beautiful. Leaves medium to small; shiny dark green. This *macrantha*

and its hybrid can stand very much cold weather. Starting in April, its blooming season is closed in June, retaining the after-glory of Indica and Kurume Azaleas all over. Ideal pot plant for late Eatser and Mother's Day.

IZAYOI

Macrantha hybrid. Flower single, 3 inches in diameter with very pleasant flesh pink color.

SEI-QUA

Macrantha hybrid. Flower single, 2 to 2½ inches in diameter. Color white, ground margined beautifully with salmon pink. Very compact grower.

WAKAMATSU

Macrantha hybrid. Flower, hose-in-hose, 2½ to 3 inches in diameter. Very delicate purple in color.

BENI-KIRIN

Macrantha hybrid. Flower very double, consisting of 15 to 20 petals; 1½ to 2 inches in diameter. Brilliant blood red with darker veins.

PRIDE OF PEACE (Showa-no-homare)

Cross-hybrid of Azalea Macarantha and A. Ledifolia. Semi-dwarf, medium sized flower of a crimson color, with large patch of white in the throat—very beautiful. Blooms two weeks earlier than Macrantha Azaleas.

SEI-KAI

Macrantha hybrid. Flower hose-in-hose, 2 inches in diameter, pure white in color. Leaves small, roundish, dark glossy green. This variety is most compact dwarf grower.

CHIKU-BU SHIMA

Dwarf type Macrantha. Flower large, hose-in-hose, variegated pink and white.

FUJI-NISHIKI

Very large flower with wavy petals. White striped with faint narrow lavender lines.

OKINA-NISHIKA

A very desirable dwarf type of *Macrantha* hybrid. Orange red hose-in-hose flower. Blooms heavily in the fall as well as in the spring.

SEI-DAI

One of the best *Macrantha* hybrids. A very large single flower, a cerise red with a white throat. Blooms about two weeks earlier than any of the other *Macrantha* varieties.

WAKAEBISU

Large hose-in-hose flower. Its bright salmon pink color is very attractive. A very heavy bloomer.

AZALEA INDICA

PINK AND ROSE RED FLOWERS

***CROEMINA**—Shell pink, large flower, earliest bloomer and very rapid grower, but not compact.

***MAXWELL**—Carmine red, mid-season, very hardy.

PERFECTION—Rose pink, large flower, mid-season.

PRIDE OF MOBILE—Lovely watermelon pink. Flower very large, mid-season; large leaves, very vigorous grower. One of the best Indica Azaleas.

ORANGE RED

COCCINEA MAJOR—Brilliant scarlet, early season, small leaves.

PRESIDENT CLAY—Orange-red with purple spot at the throat. Blooms early.

PRINCE OF ORANGE—Flower large, dark orange red. One of the richest colors of all Azaleas blooming late. Leaves medium, dark shiny green. Rather low headed with compact growth.

SALMON

DAPHNE SALMON—Medium flower with light salmon, early.

***DUC DE ROHAN**—Medium sized flower of lovely salmon pink, blooms early, leaves small, shiny green, compact.

***MOSS POINT LATE SALMON**—Pretty salmon color, very large flower with widely waved petals. Very late, hardy, vigorous grower.

WILLIAM BULL—Double flower of mud red color, late, exceedingly vigorous and upright grower.

LAVENDER-LILAC

FORMOSA—Large lavender flower, mid-season, large leaves; most vigorous grower.

GULF PRIDE—A sport of Indica Alba (*Ledifolia Alba*). Flower medium to large, straight petals of most charming light purple color never seen in other varieties with four of five large flowers clustered like *Rhododendron*. It blooms at mid-season. Leaves broad and thick, dull green covered with hairy secretion. Rather upright and open grower unless well pinched back. Very hardy and stands cold better than any other Indica variety.

WHITE

***FIELDERS WHITE**—Early, large pure white flower. Strong upright grower.

***INDICA ALBA**—(Ledifolia Alba). Snow white, large flower, early to middle season, very hardy.

LATERETIA ALBA—Medium size, pure white flower, late. Small leaves, very compact.

VARIEGATED

CRITERION—White ground well marked with wide pink stripes, late and compact.

INDICA ROSEA—(Ledifolia Rosea). Extra large flower of white with rose throat. Mid-season, upright.

VITATA FORTUNEI—White ground, well striped with lavender pink. Very early, upright, open grower.

*Indicates that we can supply only small size. Also lining-out size.

AZALEA INDICA. BELGIAN VARIETY

ALBERT ELIZABETH — Large double flower, ivory-white with frilled deep pink edge. Leaves medium to large, waxy dark green. Mid-season.

BLUSHING BRIDE—Very beautiful large double flower, light pink in color. Leaves large and glossy. Middle to late season.

COUNT DE KERCKHOV—Large, fringed double flower and variegated rose pink in color with white edge. Leaves large and glossy. Middle to late season.

ECLAIREUR—Deep crimson darker than Triumphe. Full double; leaves medium dark green. Middle season.

MME. PETRICK SUPERBA—Semi-double large flower light lavender in color with white edge. Leaves shiny green, narrow and small. Very early bloomer.

NIOBE — Large double flower greenish white in color. Leaves large, roundish and thick. Blooms late in season. This is one of the popular varieties for the Easter trade.

PAUL SCHUME—Large double or semi-double flower, color of beautiful salmon red. Early bloomer.

TRIUMPHE—One of the best varieties. Large double flower of dark crimson color. Leaves large and dark glossy green. Very vigorous grower. Blooms mid-season.

VERVAENEANA—Large double flower with salmon rose with lighter border. Leaves large and glossy green. Blooms early and a vigorous grower. Most popular variety.

VERVAENEANA ALBA—Best white variety. Flower large and full double white. Leaves large and shiny green. Blooms middle of the season.

KURUME AZALEAS

(Azalea Obtusa, Kirishima, or Kurume)

This variety which we today call "Kurume Azaleas" originated in the Kirishima Mountains in Japan and cultured and improved at Kurume, a city of the same province.

The flowers are small when compared to the Indicas but are a much more profuse bloomer; when in full bloom the leaves cannot be seen. Some produce a single flower, others a double flower which is described as a "hose in hose" type. As a group they are dwarf plants with small shiny dark green leaves.

The Kurumes withstand lower temperatures than the Indicas; when planted in sheltered locations they

will thrive as far north as Long Island. These are ideal plants for pots, borders, and rock gardens.

AMOENA—Very popular variety. Flower rose purple.

APPLE BLOSSOM—White shaded pink with light center. Leaves are a very glossy green.

BENIGIRI—Bright deep pink, single, mid-season. upright grower.

BRIDE MAID—Bright salmon red flower in large trusses. Mid-season, compact.

CARMINE PRINCE—Large size hose-in-hose carmine red in color, mid to late bloomer.

CHRISTMAS CHEER—Pleasant Christmas red, flower rather small, hose-in-hose. Heavy bloomer, early, compact.

CORAL BELL—A pleasing coral pink color shading deeper toward center. The flower is very dainty and is produced profusely. Hose-in-hose type. Low, compact.

DAYBREAK—Light pink flower in dense clusters, mid-season.

FLAME—Single large flower of brick dust red, blooms very early, upright vigorous grower.

HEXE—(**Firefly**)—A Kurume hybrid of low, dense compact habit. Flower large in size for this group. Pleasing crimson red. Semi-double, mid-season.

KURUME AZALEAS

Left to Right: 6-8 inch, 8-10 inch, 10-12 inch

HINAMOYO—Also upright grower, leaves small and branches slender. The flower, medium size, is soft pink. Mid-season.

HINODEGIRI—Most popular Japanese variety. Medium size, single flower of bright scarlet color. Leaves roundish, glossy green, very dwarf and compact.

MAUVE BEAUTY—Beautiful shade of mauve, medium size flower, very dainty.

ORANGE BEAUTY—Good size flower of orange red color. Mid-season, compact.

PEACH BLOW—Single, pale shade of peach blossom pink. Mid-season, very fine.

PINK PEARL—Most noble cherry rose color shading lighter to center. Hose-in-hose type. Mid-season, compact, but upright.

SALMON BEAUTY—Beautiful salmon pink, large size hose-in-hose. One of the best salmon varieties.

SNOW—Pure white flower, blooms profusely in clusters. Hose-in-hose. Mid-season, low, compact, one of the best whites.

SWEET BRIER—One of Dreer's introductions. It is said that this is one of the hardiest in its group. Flower elegant rose pink.

YAE GIRI—Salmon red, hose-in-hose, mid-to-late-season. compact.

NEW KURUME AZALEAS

Several years ago we imported a number of Kurume Azaleas from Japan. Since then we have been experimenting with them and watching their development. This season we are very glad to be able to offer to our customers a few of them as follows:

FUJI-NO-ASAHI—The flower is hose-in-hose, medium to large in size. Color: White with faint salmon pink flushed on the tips of the petals as sunlight would flash on the snowy peak of a mountain. Leaves are large and thick with very shiny dark green. It is a vigorous grower.

HIME-KAGAMI—Medium to small hose-in-hose flower. White with occasional stripes of faint pink. Very heavy bloomer. Vigorous, compact grower.

KIN-TAIYO—Large hose-in-hose with long white petals which are edged with bright orange. The flowers are very attractive and distinctive.

KUMOI—The flower is hose-in-hose medium to large with somewhat crinkled petals. Color: Light crimson-carmine with less coloring at the throat. Leaves are medium to large and shiny green.

MIZU-NO-YAMABUKI — Flower small, hose-in-hose; color is creamy white. This is the only variety of the several hundred Azaleas producing a yellowish flower. Leaves very small and a very compact grower.

YAKUMO—The flower is of medium size, hose-in-hose with roundish petals of maroon red. Leaves are roundish and medium; very compact.

MACRANTHA AZALEA

(*Azalea Indicum Macranthum*, *Satsuki Azalea*)

A distinct characteristic of this variety is the lateness of its blooming period. It blooms very late, usually in April, May and June and some throughout the whole summer. Those desiring to have Azaleas in bloom after spring should try these varieties.

The flower is similar to the Indicas in size and colors. Without its flowers it makes a very beautiful plant for the garden. It has very small and shiny dark green leaves; and grows compactly, dwarflike. Very hardy.

MACRANTHA—Large single flower of clear pink, very late, low headed and compact.

MACRANTHA DOUBLE—Double flower of large size, clear pink. Very late, compact but rather upright.

RED MACRANTHA—Large single flower, dark orange red. Very beautiful.

Prices of the above Macranthas same as Kurumes.

NEW HARDY KAEMPFERI HYBRID AZALEA

BETTY—Brilliant crimson pink of large size.

FEDORA—Deep salmon rose.

MARY—Pretty deep pink. Distinct from all others.

OTHELLO—Orange red, vigorous grower.

PURPLE KING—Purplish rose.

Prices on the above Kaempferi Azaleas are the same as Indica Azaleas.

CAMELLIA JAPONICA

Commonly known as "Japonica" in the South; becoming recently a most popular plant, not only in the Gulf Coast region, but all over the country. Its glossy green foliage all the year around, together with most attractive and beautiful flowers in winter, when no other flowers are found in the garden, has been increasing the admirers of the plant. Millions of them are set out every year in open grounds or in conservatories and green houses as pot plants. It will regain without any doubt a popularity stronger than it possessed half a century ago even as cut flowers.

Brief Cultural Hints

Soil Preferred—Camellia grows in almost any soil, but well drained, good garden soil a little acid in reaction is more suitable.

Location Desirable—Half shady location is preferable, especially when the plants are young. Free

blooming cannot be expected in a place entirely shaded.

Root System, Transplanting—The root system of the Camellia is rather coarse and not quite so easily transplanted as the Azalea.

Fertilization Effective—The Camellia is a gross feeder; it responds well to fertilization. At the time of planting, if the soil is not fertile enough, use a mixture of one-half of garden soil, one-fourth of well rotted cow manure and one-fourth of peat or leaf mold. Every winter or early spring apply well rotted cow manure; bone meal or cotton seed meal, or similar commercial fertilizer may be added if necessary. Mulching with half rotted leaves or peat is also beneficial.

Proper Watering—The Camellia loves a humid atmosphere. Do not neglect the watering. Frequent syringing on the leaves helps a great deal during the dry summer months.

Pruning Right—Proper pruning is also essential. Prune with care such as water shoots, dead or injured branches and branches growing too close together. General pruning should be done in the month of February; otherwise it may have a bad effect on the flower buds.

Spraying Advisable—Red spider and various scales may attack Camellias. We have been using "Volck Jr." at the ratio of 1 to 40 in the summer and 1 to 25 in winter, mixing one teaspoonful of Black Leaf 40 to every gallon of solution. Thorough spraying twice a year controls these pests satisfactorily. The strong sun has to be avoided after spraying as it may cause the leaves to burn.

NEW CAMELLIAS

For many years we have devoted much of our time and care to produce new varieties of Camellias. Our tireless efforts in this enterprise have been rewarded. We are proud to introduce to our customers this year a number of these unusual and very exquisite new creations.

As our supply of these new varieties is very limited, we are able to offer them only to the purchasers of standard varieties of Camellia. No discount of prices.

Camellia. Mrs. K. Sawada

(U. S. Patent No. 481)

We take great pleasure to introduce this beautiful new Camellia to our customers this season.

We have named this variety for the wife of the originator who devoted much of her time in helping him in his work along this line. Unfortunately, she passed away without seeing this beautiful flower. It seems to us that this flower represents exactly Mrs. Sawada's appearance and character—such purity, gentleness, warm-heartedness, and sweetness of disposition, etc.

The flower is full double, gardenia-type, imbricated. It is 3 to 3½ inches in diameter, consisting of 70 to 100 petals. Color is delicate pink, shaded on white. The flower resembles the flower of Lady Humes Blush somewhat, but is slightly larger in size, blooms heavily from February to March. The lasting quality as a cut flower is exceptionally good. The leaves are small, of finer texture, very vigorous, upright grower, very compact, with long, slender branches. Its resisting power against the freeze is very great.

Many florists who have seen this flower agree that this is the most ideal Camellia flower for their corsage work.

MENA LADNIER

This new variety was originated by Mrs. Wilhelmina Ladnier of Pascagoula, Miss. Many years ago she planted many Camellia seeds and this wonderful flower came out among them. We have named this variety "Mena Ladnier," honoring the originator by her consent.

The flower is full double, 4½ to 5 inches in diameter. There are 24 guard petals and 90 to 100 small petalalets which compose a peony form. The color is usually brilliant blood red, but occasionally a flower slightly marked with white is found, also solid pink flowers may bloom on the same tree. The flowers bloom mid-season. This variety grows very vigorously and has thick, heavy, coarse branches. The leaves are exceptionally large and are very shiny dark green.

Camellia. Mena Ladnier

Overlook 24 Nursery

K. SAWADA (U. S. Patent No. 431)

This most outstanding new Camellia was recently created by us. The flowers are of pure white, very double, and fully imbricated. It is usually 4-5 inches in diameter, but often much larger. It has 50-70

Camellia K. Sawada

Overlook 25 Nursery

petals, the edges of which are rolled inward and are symmetrically overlapping each other. When the flower is fully opened it sometimes shows a few small petaloids or yellow stamens in the center. It blooms from January to March, a very heavy and free bloomer. The leaves are medium in size and thickness, elliptical to lanceolate, and serrated, and leathery and dark green. Growth is very vigorous, semi-upright, and very compact and symmetrical. This new Camellia is much hardier than Alba Plena. Everyone who has seen this new Camellia agrees that it is the best white Camellia we have ever had in this country. This is the most profitable variety for cut flowers.

Price on above three new Camellias—

2½ inch pot (spring del'y).....	1.50	10.00
6-8 inch, lath house grown, B&B	2.50	20.00
8-10 inch, lath house grown, B&B	4.00	35.00
12-15 inch, lath house grown, B&B	5.00	45.00
15-24 inch, lath house grown, B&B	7.50	

IMURA (Our Seedling #12)

Semi-double flower 5 to 6 inches in diameter, consisting of 15 large petals of a snowy white and porcelain texture and numerous yellow stamens in the center. The anthers of the flower is very large and shaped like an arrow or spear, very distinct from other varieties. Blooms mid-season. Leaves are large, narrow and long, smooth, very shiny dark green.

LURIE'S FAVORITE (Our Seedling #172)

Semi-double flower 4 to 5 inches in diameter. Has 16 to 18 petals which are crinkled and resemble crepe paper in texture. Color: soft lavender pink with darker veins. Blooms abundantly in mid-season. Leaves very small, roundish, smooth and very shiny dark green. Compact grower.

QUEEN BESSIE (Our Seedling #127)

Semi-double, 3½-4½ inches in diameter, very wavy large petals and numerous yellow stamens. Color: clear white with faint flushes around the center presenting a very soft and delicate appear-

ance. One of our best hybrids. Blooms mid-season, rapid grower with large green dark leaves.

RISING SUN (Our Seedling #177)

This is one of the best single flowered Camellias that we have. The flower which is 4 to 5 inches in diameter opens flat showing 6 large petals and numerous yellow stamens. Certainly a beautiful flower—bright crimson red of velvety softness. Anthers are a bright yellow, filaments pink.

SARA-SA (Our Seedling #119)

Semi-double flower 4 to 5 inches in diameter. Has 12 large petals and yellow stamens at the center. Flesh color dotted and striped with darker pink. Blooms mid-season. Large leaves; very vigorous grower.

WHITE PINE CONE (Our Seedling #179)

Flower semi-double, 3 to 4 inches in diameter with 16 narrow pointed incurved petals. This flower is quite different from all others in shape. It resembles a pine cone before it opens. Pure white in color, blooms late. Leaves large and thick, rapid grower and very hardy.

FRIZZLE WHITE (Our Seedling #128)

Semi-double, 3½-4½ inches in diameter, very wavy crinkled petals intermixed with numerous yellow stamens. Resembles Super Nobilissima but much larger. The flowers are pure white. The leaves are small narrow and pointed.

RARE CAMELLIAS

These varieties are the finest and are still very scarce in the market today. As our supply of this class is very limited, we offer the following varieties to customers of standard varieties only. No discount given for this division. We have some kinds in sizes larger than listed.

VICTOR EMANUEL—The finest Camellia that we know today. Very large peony-shaped flower, deep velvety red.

Price on Victor Emanuel same as new Camellia.

PURPLE EMPEROR—(Mathotiana Rubra, Purple Dawn, etc.)

Flower very large, 5 to 6 inches in diameter. Rose type, dark crimson red mixed with purple.

C. M. HOVEY—Flower resembles Purple Emperor, but variegated with white. Very fine.

JULIA DRAYTON—Very large flower, rose type, resembles Purple Emperor.

WM. S. HASTIE—Nearly identical with Purple Emperor.

SARA C. HASTIE—(Debutante)

Flower peony type, very light pink. Blooms very early.

EMPEROR—(Emperor of Russia)

Semi-double to double flower of large size. Has large petals of dark crimson red. Very large and roundish thick foliage.

EMPRESS—(Lady Clair, Grandiflora Rosea, etc.)

Single to semi-double, light pink and very large flower.

GIRARD-DE BAILLON—We believe this to be the most charming Camelia now in existence. The flower is not very large, 3 to 3½ inches in diameter. But it is an attractive form of peony type with a charming color combination of brilliant red and white. A slow grower.

LADY HUMES BLUSH—Very famous old variety but yet rare. Full double rose type flower, white with delicate flesh pink. One of the best for corsages.

LAUREL LEAF—Very large flower. Full double, light salmon pink blotched with white. Leaves narrow and pointed like a Laurel leaf.

COMTESSE NIEPORT — Flowers are full double peony type with 8 to 10 large guard petals and 12 to 15 medium sized petals intermixed with numerous yellow stamens. Petals are very crinkled, soft pink spotted with faint white. Blooms very freely and in mid-season.

GIGANTIA (Kellingtonia, Magnolia King)—Semi-double, very large flower usually 5 to 6 inches in diameter. Color, red marked with white. Large groups of yellow stamens at center. Leaves are extra large and thick, very dark, shiny green.

VEDRINE (Our Lewis Red Peony)—Semi-double to double peony type flower, 4 to 5 inches in diameter often 6 inches. Color is a brilliant red shading into a deep crimson with a velvety tone. This fine variety blooms mid-season.

Prices on above varieties—

2½ inch pot (spring delivery)	.75	5.00	40.00
6-8 inch, C. TT., lath house grown, mostly single stem, B&B	1.00	8.50	75.00
8-10 inch, C. TT., lath house grown, mostly single stem, B&B	1.50	12.50	100.00
10-15 inch, C. TT., lath house grown, partly branched, B&B	2.00	17.50	150.00
15-20 inch, C. TT., lath house grown, partly branched, B&B	4.00	35.00	

AUGUSTA WILSON—It is our great pleasure to have named this variety "Augusta Wilson in memory of a famous writer of Mobile. She was very fond of this variety and planted it in the gardens of her home in Ashland Place many years ago.

The flower is very double and peony type, 3½ to 4 inches in diameter. It is a soft pink; some flowers are marked with faint white spots. Blooms before Christmas. Leaves are large, thick and roundish.

ALBA PLENA—Very famous old variety, yet very scarce. Flower is full double, pure snowy white. One of the best whites, but tender.

COLONEL FIREY (No. 47)—The flower is 4 to 5 inches in diameter with 90-100 symmetrically overlapping petals. Bright red to deep vermillion red. Blooms in mid-season.

DAINTY—The single flower, 3 to 3½ inches in diameter, is bell shaped. Has five petals of soft pink and numerous yellow stamens. A tree loaded with blooms is a charming sight.

GOVERNOR MOUTON—A famous variety from Louisiana. A large peony type flower, oriental red marked with white spots. Free bloomer at mid-season.

LADY VAN SITTI VARIEGATA—One of the most beautiful of variegated Camellias. Semi-double flower 3½ to 4 inches in diameter often reaches 5 inches. Pure white base striped with various shades of red. Leaves are small and narrow, very crinkled. Grows upright and compact.

KUMASAKA—A Japanese variety. Large peony type flower of deep pink.

MARY E. M. (From Jungle Gardens)

Large salmon pink flowers, semi-double. Blooms from mid to late season. Vigorous grower and free bloomer.

MONARCH—(Gunelli, Honneur D' Amerique)

Peony type flower of deep pink often spotted with white. Blossoms often measure six inches across.

PURPLE PEONY—(Wm. Penn)

Flower semi-double, peony type of medium size. Real dark crimson to deep purple color with large white markings. Plants are very slender with weeping branches of deeply serrated leaves.

TEUTONIA—Full double rose type. The tips of the petals are curved in; petals overlap each other symmetrically. The original tree produced various colors—fleshy pink, white faintly striped with pink and dark. Very slow and compact grower.

One of profitable varieties for cut flowers.

Prices on above varieties—

Camellia Monarch

STANDARD VARIETIES

Group A:

ANNA FROST — Semi-double, large loose peony type, dark blood red in color. Large, round and thick extra shiny dark green leaves.

BELLE ROMANA—Full double flower 3 to 3½ inches in diameter made up of 70 to 80 petals. The flower is very soft pink striped profusely with dark crimson.

CHANDLERI ELEGANS — Semi-double to double peony type flower. The flower, one of the largest of all Camellias, is a pretty cherry red with white variegations. Blooms mid-season; slow grower.

CANDIDISSIMA—Very double flower of medium size. Petals overlap each other symmetrically forming a star. Pure white bloom in late season.

COUNTESS OF ORKNEY—Large, very double rose type flower. The usual color is white with pink stripes, but sometimes solid pink flowers appear

Camellia Teutonia, Pink

on the same bush. Slow and compact grower, but blooms very young. Fine variety for pot culture.

DERBYANA (J. G. Peonyflora)—Very large flower blooms late season. Semi-double to double peony type. Dark crimson in color. Very vigorous grower.

ELLEN McKINSEY—Flower medium to large, peony type, dark crimson spotted with white. Blooms very early, preceded only by Daikaguara. The leaves resembles Prince Albert.

FLESH PINK PEONY (Shell Pink by McIlhenny)
One of the latest bloomers. It starts blooming when most of the other varieties are through blooming. The flower is medium, peony type of beautiful flesh pink. It is a heavy bloomer and compact grower.

HERME—Very large semi-double flower variegated pink and white. Generally, the margin is white. A very popular variety.

LADNIER'S RED—(Prince Eugene Napoleon, Pope Pius IX, etc.)—Large flower, very double, bright red to dark red, sometimes spotted with white. Hardy and a free bloomer.

LADY VAN SITTI—Very large flower, semi-double, of a most pleasant shade of red. Blooms freely mid-season. Very small and narrow pointed leaves, crinkled and very shiny dark green. Upright grower.

LADY SAUMAREZ—Large single to semi-double flower. Brilliant dark red with white spots. Resembles Donkelari, but smaller. Early and free bloomer.

MARIE LOUISE (No. 60)—Double peony type flower of medium size. Pleasant red marked with white—very beautiful. Slow grower and has spreading habit.

OPELOUSA PEONY—(Althea Flora by some Nurseries)—Peony form flower with light pink and white; occasionally they are solid pink.

OTOME—Full double, flesh pink with darker veins. Much like Pink Perfection.

PINK PERFECTION—Most popular variety. Full double, light pink. Early and free bloomer.

PROF C. S. SARGENT—Full double, peony type, tightly formed. Very dark red color. Blooms freely mid-season. A very popular variety.

PURITY—Pure white, full double flower with open center.

STILE'S PERFECTION PINK—(Formerly called by us *Rubra Virginalis*)—An outstanding variety. Peony type flower 3½ to 4 inches in diameter. Pleasant soft pink color. Early and free bloomer. Small leaves.

WHITE TRICOLOR—A sport of Tricolor. Pure white semi-double flower with yellow stamens in the center.

Price on Group A—

GROUP B:

ABBY WILDER, PINK—Full double peony type flower, medium size, flesh color. Very beautiful.

BROOKLYANA—Very double, medium sized flower; deep pink mottled with white. Blooms early. Leaves large and thick. Vigorous grower.

CARNATION—(Rose Emry, Orient, etc.)

Medium sized peony type flower. Dark red crimson blossoms look like carnations. Very hardy.

- CHEERFULNESS**—Double, medium sized rose type flower. Deep pink, blooms very early. Upright grower.
- CREO PINK**—Large single flower, 4 to 4½ inches in diameter. Flower has 7 large wavy petals and numerous yellow stamens which forms a cylindrical mass in the center. Color, purplish pink with darker veins.
- DIXIE** — Medium sized flower, very double, rose type. Rose pink petals symmetrically formed.
- DOBREEL**—The flower is medium to large, full double imbricated, dark crimson, sometimes marked with small white spots. Leaves very large. A most vigorous grower.
- DUKE DE ORLEANS (Marguerite Guillon)**—Large flower, peony type; creamy white striped and dotted with pink and red. Hardy and blooms well.
- ELATA** — Very large semi-double flower. Semi-peony type with yellow stamens. Deep rose to carmine color. Blooms mid-season.
- ELIZABETH** — Flower double, medium, usually white but often striped with faint narrow pink stripes. Very strong grower.
- GLORE DE NANTES**—Large semi-double flower, deep rose color. Leaves are large, roundish, thick and very shiny dark green, which easily identifies it from all others.
- JARVIS RED**—Large semi-double flower with long crinkled petals. Dark vermillion color. Very popular on the Gulf Coast.
- MATHOTIANA ALBA** — Large full double rose type flower, pure white but occasionally striped with faint pink. Leaves very large and thick.
- MRS. HOFFEINS VARIEGATA (No. 27)**—Large semi-double flower, white striped with pink. Sometimes a solid pink flower is produced on the same bush.
- NOBILISSIMA** — Semi-double peony type flower with yellow stamens. White color with a creamy tint around the center. Very early.
- PRINCE ALBERT**—Flower, medium sized, peony type, soft lavender-like pink spotted with white. Leaves are deeply serrated and rather light green.

RUBRA VIRGINALIS — (Formerly called Jeanerette Pink by us). More familiar along the Louisiana coast. Loose peony type, salmon pink. Very fast grower.

SARAH FROST—Very popular on the coast. Dark crimson, full double rose type. Hardy.

TRICOLOR—Large single to semi-double flower, white striped with pink. (Once in a while it produces a red flower.)

WARRATH (Honeycomb) — Very double, peony flower. Resembles Prof. Sargent, but the guard petals are five in number and the center of the form is very tight like a comb of honey.

WM. DOWNING—Semi-double, large flower, 4 to 5 inches in diameter, 9 to 12 large, straight, thick petals which are purplish pink or red. Very vigorous grower and very resistant to cold.

Letters from Our Customers

We have received several thousand very encouraging letters from our customers who have been well pleased with our plants. That makes us very happy for only insofar as we have satisfied our customers do we feel that we have made progress in our business.

Jacksonville, Fla.
August 30th, 1939.

Overlook Nurseries,
Crichton, Ala.
Gentlemen:—

I am much pleased with the quality of Camellia stock obtained from you last spring. They are all fine thrifty plants and were received in good condition due to the careful packing.

Yours truly,

GRAFTED CAMELLIAS

We are offering this year a few of our Grafted Camellias. Understocks are 4 to 6 years old. Plants were grafted last winter. The following sizes are available: 12 to 15 inches, 15-18 inches, 18-24 inches. Available varieties: K. Sawada, Victor Emanuel, Purple Emperor, Empress, C. M. Hovey, Laurel Leaf, Girard De Baillon, Kumasaka, Mary E. M., Nagasaki, Sara C. Hastie. Prices given upon application.

CAMELLIA SASANQUA

Despite its recent introduction to this country, the Camellia Sasanqua has already become widely known and is gaining popularity among flower-lovers with wonderful rapidity. It blooms ahead of Japonica by months—generally from September to December. Size of blossom is about the same as Camellia Japonica in different colors. Leaves are much smaller and the branches are slender, which appearance gives a softer tone to landscaping. It has value also as a pot plant.

CLEOPATRA

One of our introductions from Japan. The flower is semi-double, peony type, 3 inches in diameter with 12 to 14 petals and a few yellow stamens. Color is rose pink. The leaves are roundish in shape and dark shiny green. Very compact grower.

	Each	10	100
4-6 inch, C. T.		2.00	15.00
6-8 inch, C. T.		2.50	20.00

3-4 feet, field grown, B&B....	3.00		

DAWN (Akebono)—This is the hardiest *Sasanqua* of all, withstanding the severest freezes. When the buds of the other varieties are frozen its blooms stand perfectly. The flower is single to semi-double ivory white with flesh pink at the margin of the petals and yellow stamens. The leaves are small, narrow, dark shiny green. Very

Camellia Sasanqua "Dawn"
(This picture was taken 10 days after
very severe freeze)

compact, symmetrical pyramidal shape; slow grower.

4-6 inch, C. T.	2.00	15.00
6-8 inch, C. T.	2.50	20.00
8-12 inch, C. TT.	3.00	25.00

3-4 feet, field grown, B&B	2.00	

NEW CAMELLIA SASANQUAS

This, the first year that we are offering to you, the following new Camellia Sasanquas which we created:

1. MUTT'S WATERMELON PINK

Grows tall and slender with beautiful watermelon colored flowers of the single type.

2. JEFF'S WATERMELON PINK

Short and fat with rosetted branches and large, thick leaves. The flower is single, but very large; beautiful watermelon pink in color.

3. ROSEA PAPAVER

Has large single flowers shape of poppy. Color is very delicate soft pink. A vigorous grower.

4. CRIMSON VELVETTI

The flower is single, with 8-9 petals. The color of flower is beautiful crimson with a velvety tone.

5. WILLOW LEAF

The leaf is very narrow, much resembling a willow leaf. Symmetrical, pyramidal shape, with very compact branches. Flower is single. Color is white with pink margin.

6. ROSEA GRANDIFLORA

Very large flower with 7 to 9 large, long petals. This flower opens flat, quite different from Rosea Papaver. Color: Light soft pink. Bush grows wider than its height.

7. LAVENDER QUEEN

Large single flower of deep lavender pink.

8. TRICOLOR MAGNIFICA

Single flower with 6 petals, medium size. The color is beautiful three-tone—white in the center, outer edge of lavender, and between these two colors filled by soft pink. Compact, upright grower.

9. GRANDIFLORA ALBA

Flower single, very large 4 to 4½ inches in diameter. Color is snow white. A very vigorous grower.

10. FLORIBUNDA

Flower is medium in size with 5 petals. White with lavender margin—very beautiful. This is one of the heaviest bloomers. Slender, upright grower.

Each 10

Prices on above new Camellia Sasanquas.

4-6 inch, C. T.50	4.00
6-8 inch, C. T.75	6.00

CAMELLIA THEA (True Tea Plant)

	Each	10	100
6-8 inch, C. T.		1.00	8.00

CLEYERA JAPONICA

4-6 inch, C. T.	1.00	8.00
6-8 inch, C. T.	1.25	10.00

CLIFTONIA MONOPHYLLA

(Titi Bush, Buckwheat Tree)

One of the handsome native evergreen bushes thriving in the damp, peaty soil along the Gulf Coast region. Naturally it grows to fifteen to twenty feet or more, but can shear it back to any shape desired, with very compact growth. Leaves, which are larger than yaupon, are thick, leathery, and are dull green color. Some of them turn to scarlet red in the late fall. The flower grows in nodding racemes, generally white in color. The seeds resembles very much that of the buckwheat in shape. We have cultivated them for years and have found that it is a very useful broadleaf evergreen for the Southern garden.

We can supply only small lining out sizes.

6-8 inch, C. T.	1.00	8.00
8-12 inch, C. T.	1.25	10.00

CLIFTONIA MONOPHYLLA ROSEA

(Pink Titi Bush)

Very rare. We found this among a million bushes. It bears light pink flowers.

6-8 inch, C. T.	20	1.50	12.00
8-12 inch, C. T.	25	2.00	17.50

COTONEASTER FRANCHETTI

6-8 inch, 2¼" pot, (spring delivery)	.75	6.00
8-12 inch, 2½ inch pot	1.25	10.00

DURANTA

(Golden Dewdrop)

Bears lavender flowers, followed by golden berries.

6-8 inch, 2½" pot	1.00	6.00
8-12 inch, 3" pot	1.25	10.00

ELAEAGNUS PUNGENS FRUITLANDI

4-6 inch, C. T. (spring del.)	.75	6.00
3-4 feet, field grown, B&B	1.50	
4-5 feet, field grown, B&B	2.00

Flowers of Gordonia

ILEX (Holly)

Holly of any variety in general is very difficult to transplant, therefore we offer this year some varieties carefully grown in pots, as we know that the best results are to be obtained by this method.

I. CASSINE (Dahoon Holly)

A popular evergreen, native of northern Florida. Leaves have no spine, much resembles Ilex Integra, but not so shiny green as the others. Producer of bright red berries in abundance.

ILEX CASSINE ANGUSTIFOLIA

An evergreen with very narrow leaves. Produces red berries at an early age.

ILEX CASSINE MYRTIFOLIA

The leaves of this variety are much smaller and stiffer than Ilex angustifolia. A handsome evergreen shrub with red berries.

Prices on the above Hollies:

4-6 inch, C. T. (spring del.)	.75	6.00
12-18 inch, C. TT.	1.50	12.00
3-4 feet, field grown, B&B	1.50	
4-5 feet, field grown, B&B	2.50	

ILEX CORNUTA FEMINA

This is the berry-bearing Chinese Holly. Our cuttings were taken from berry producing specimens.

4-6 inch, 2½" pot, (spring del.)	.90	7.00
6-8 inch, 2½" pot	1.25	10.00

ILEX CORNUTA BURFORDI

A handsome form of Ilex Cornuta. The leaves are shiny green with one lone spine at the apex. Our cuttings were taken from berry bearing specimens.

4-6 inch, 2¼" pot (spring del.)	.75	6.00
6-8 inch, 2½"-3" pot	1.00	8.00
8-12 inch, 2½"-3" pot	1.25	10.00
2-3 feet, field grown, B&B	1.50	
3-4 feet, field grown, B&B	2.50	
4-5 feet, field grown, B&B	3.50	

ILEX CRENATA

(Dwarf Japanese Holly)

ILEX CRENATA ROTANDIFOLIA

Similar to above variety, but the leaves are much larger and roundish.

Prices on above two Ilex:

4-6 inch, C. T.75	6.00
6-8 inch, C. T.	1.00	8.00
8-12 inch, C. TT.	1.25	10.00
12-18 inch, field grown, B&B	.75	
18-24 inch, field grown, B&B	1.00	
2-3 feet, field grown, B&B	1.50	

ILEX INTEGRA

A very beautiful evergreen. Has dark shiny leaves which taper at the point. Bears white flowers in May and beautiful red berries in the winter.

4-6 inch, C. 2½" pot	1.00	8.00
6-8 inch, C. 2½" pot	1.25	10.00

ILEX LATIFOLIA

(Big Leaved Holly)

Hardy evergreen shrub. Leaves are oval to oblong-lanceolate, serrate, thick, and large. Bears

small flowers in May and red berries in the winter.

6-8 inch, 2½" pot	1.25	10.00
8-12 inch, 2½-3" pot	1.75	15.00

BERRY-BEARING HOLLIES

Left to Right: American holly 2½ inch P.; Chinese holly 2¼ inch P.; Yaupon 2½ inch P.

I. OPACA FEMINA (Berried Kind)

Well known native evergreen growing wild. However, this wild plant is hard to transplant successfully. Moreover, it bears no berries in many cases. Our propagation was done by cuttings secured from the best berry bearing specimens and are guaranteed to bear.

4-6 inch, C., 2½ inch pot, (spring delivery)75	6.00
6-8 inch, C., 2½ inch pot.....	1.00	8.00
8-12 inch, C., 2½ to 3 inch pot	1.50	12.00
3-4 feet, field grown, B&B	1.50	
4-5 feet, field grown, B&B	2.50	
5-6 feet, field grown, B&B	3.50	

I. PEDUNCULOSA

A beautiful evergreen shrub with shiny and somewhat curled leaves. Red berries in the fall.

4-6 inch, 2½ inch pot	1.00	8.00
6-8 inch, 2½ inch pot	1.25	10.00

I. VOMITORIA FEMINA

(Berry Bearing Yaupon)

Ours propagated strictly by cuttings from heavily berried specimens.

	Each	10	100
4-6 inch, 2½" pot (spring del.)		.75	6.00
6-8 inch, 2½ inch pot		1.00	8.00
8-12 inch, 2½ to 3 inch pot....		1.25	10.00
2-3 feet, field grown, B&B	1.25		
3-4 feet, field grown, B&B	2.00		

I. VOMITORIA NOBILIS

This strain was found some years ago by Mr. Garee of the Noble Nursery, Noble, Oklahoma. He picked up one tree in perfect condition among several thousand common Yaupons badly injured or killed by an unusually severe freeze which visited that locality one winter. Propagation with cuttings from this plant was carried successfully and no crop missed ever since. Compared with the other Yaupons the leaves of this strain are slightly thinner in texture and larger. It grows faster and more compactly in addition to its resisting power from freeze.

	Each	10	100

PHOTINIA GLABRA

This beautiful shrub was introduced by us to this country. Whenever covered with new sprouts Photinia Glabra is a mass of burning scarlet, tinted here and there with old leaves of green. You will surely be convinced that this is one of the best trees ever introduced. There are several different strains; beware of the inferior kinds. It may be made in any shape you desire, such as pyramidal, standard or globe. Suitable for hedge, individual planting as well as mixed setting among green leaved evergreen.

4-6 inch, C. T.75	6.00

ORIENTAL MAGNOLIA

Although not known much in the South, Oriental Magnolias are most highly esteemed by Northern and Eastern gardeners. It is a very beautiful flower in early spring.

M. DENUDATA

Well known as Magnolia Conspicua. Large, pure white flowers appear at early spring before its leaves come out.

2½ inch pot30	2.50
-------------------	-----	------

M. DENUDATA HYBRID

Grows to a tree 25 to 30 feet high. Flower much larger than M. Soulangeana, 9 petals. Color ranges from white with pink to almost white. Leaves roundish and very large. One of the best magnolias.

2½ inch pot	2.50	20.00
-------------------	------	-------

M. ALEXANDRINA

Hybrid of Magnolia Denudata and Magnolia Liliflora. It is similar to M. Soulangeana, but grows much taller and both the flower and foliage are larger. Large flower of nine petals, heavily flushed rose purple with darker lines. Leaves somewhat curled and of a very soft texture. In our nursery Alexandrina blooms from a week to 10 days later than Soulangeana. Hardy and vigorous grower. The parent trees from which

our cuttings are obtained are over 35 feet high. This magnolia is more beautiful than Soulangiana; a very valuable kind.

2½ inch pot30	2.50
12-18 inch, field grown, B&B	.75	
18-24 inch, field grown, B&B	1.25	

M. LILIFLORA

Lily shaped flower, dark purple at the outside and creamy white on the inside of the petals. Late bloomer.

JAPANESE FLOWERING CHERRY

Heretofore it was believed by many Southern gardeners that the Japanese Flowering Cherry tree could not be successfully grown down South. It is now, however, proved by us that they can be, if the varieties best acclimated are used. You are invited to visit us and see for yourselves thousands of them thriving wonderfully and blooming in our nursery grounds.

PRUNUS YEDOENSIS (Somei-Yoshino)

One of the most popular varieties in Japan, being planted in parks, temple grounds, school yards, along the river banks and highways in Tokyo. A rapid grower with rather slender branches. Estimated height about 30 feet. The flower is rather small and 3 to 6 flowers in a corymb or cluster. Pinkish white in color, slightly fragrant. It blooms profusely before young leaves sprout.

	Each	10	100

RHODEA JAPONICA

A fine house plant from Japan. It resembles Sanseveria somewhat, but it more dwarfed. It has dark green curled leaves and spikes of creamy white flowers, which are succeeded by spikes of showy red berries. Very attractive; varieties of this kind are esteemed by the Japanese so much that sometimes as much as one to five thousand dollars is paid for a single plant.
